

The Hani Hanjour Airshow

“The idea that an unskilled pilot could have flown this trajectory is simply too ridiculous to consider”
Ralph Omhold, Former (Captain Qualified) 757 pilot.

“For a guy to have jumped into the cockpit [one of these planes] and fly like an ace is impossible”
Russ Wittenberg, Commercial Pilot (inc 757's) of 35 years and former Vietnam fighter pilot.

..in fact, Hani Hanjour was widely reported to be a terrible pilot by those who flew with him.

“I couldn't believe he had a commercial license of any kind with the skills that he had”
JetTech flight school Manager, Peggy Chevrette.

How is it reasonable to accept that Hani Hanjour — who previously had difficulty flying a small Cessna — executed in a Boeing 757 a well controlled 330 degree downward spiral , descending 8,000 feet in 3 and a half minutes, flying so low as to clip light poles...then fly with pinpoint accuracy into the Pentagon??

And why would the alleged hijackers expose themselves to another few minutes in the air at the risk of being shot down in attempting this incredible manoeuvre. All this effort to target the only section of the Pentagon that was being renovated/strengthened and therefore largely unoccupied... and whilst the top brass (such as Defense Secretary Rumsfeld) were potential sitting ducks in another section of the Pentagon?
